# Overview

---

➔ Program Goals

➔ Proposal / Evaluation Criteria

# ***NSF in a Changing World***

---

## **⇒ 3 overarching goals**

- ☞ world class science**
- ☞ promote discovery in service to society**
- ☞ excellence in science math and engineering education**

## **⇒ 4 core strategies**

- ☞ strengthening physical infrastructure**
- ☞ integrating research and education**
- ☞ promote partnerships**
- ☞ developing intellectual capital**

**Equal value for research and education.**

# ***The Science and Technology Centers: Integrative Partnerships (STC)***

---

- ⇒ Research efforts not before possible
- ⇒ Involvement of researchers in education efforts at a different level
  - ⇒ (bring your creative juices to bear on the k-12 education system of this nation..with institutionalization of models in mind)
- ⇒ Not feel good education and outreach
- ⇒ A cultural Change agent on campuses

# Issues possible to approach in this mode of support

---

- ⇒ Connectivity of the community for various items (research, education, communications)
- ⇒ Partnerships in research, education
  - ⇒ (U/I; U/U; U/State; U/Fed; U/INT) too numerous to enumerate all
- ⇒ International issues
- ⇒ Education over the web (curriculum reform)
- ⇒ Models for dissemination
- ⇒ Innovative and non-traditional uses of technologies/communications

# **STCs...A VERY RISKY BUSINESS**

---

- ➔ Risk in research outcomes
- ➔ Risk in educational goals
- ➔ Management Risk

# ***Proposal Evaluation Criteria***

---

1. What is the intellectual merit of the proposed activity?
2. What are the broader impacts of the proposed activity?
3. Integration of research and education
4. Integrating diversity into NSF programs, projects, and activities.
5. Value of the center-mode to research, education, and knowledge transfer.
6. Integrative nature of the proposed center.
7. Leadership, management plan, impact of institutional support, and budget.

# ***Awardees vs. Declinees***

---

- ⇒ **Value Added**
- ⇒ **Regional or National Impact**
- ⇒ **Demonstrated commitment of Institutions**
- ⇒ **Leadership**

### Integrative Partnerships

The National Science Foundation (NSF) established the Science and Technology Centers (STC) Program in 1987, as part of the President's State of the Union Address, to fund important basic research and education activities and to encourage technology transfer and innovative approaches to interdisciplinary activities. The STCs explore new areas and build bridges among disciplines, institutions, and other sectors. They offer the research community an effective mechanism to: embark upon long-term scientific and technological research activities; explore better and more effective ways to educate students; and develop mechanisms to ensure the timely transition of research and education advances made into service in society.

**Specifically, center support enables academic research teams to:**
